## TENNIS TEAM ON FIRST JAUNT, IN GEORGIA TODAY

### Netters Getting Taste of Intercollegiate Competition

The University of Tampa netters, getting their first taste of intercollegiate competition on a lengthy road trip taking them through the northern part of the state and Georgia this week-end, met the Stetson Hatters Wednesday afternoon and the South Georgia Teachers at Statesboro, Ga., yesterday. Today they will face the Middle Georgia college at Cochran, Ga.

Bill Culbreath, graduate manager of athletics, made all arrangements for the matches and is accompanying the squad of five players on the trip. Those on the team are Albert Day, Louis Sullivan, Lamar Bretton, William Laird and James Turner.

Their engagement with the Abraham Baldwin college at Tifton tomorrow is the final tilt on their road schedule, after which they will return to Tampa.

Lack of experience played great havoc when the Spartans went into action against the South Georgia Teachers. According to a report received from Bill Culbreath last night, the losses were heavy. They lost the clay court games 7 to 0.

In the singles Wilkins Smith took Albert Day, 6-4, 6-1. Charles Munch defeated Billy Laird on love sets. Alton Settles walked away with Louis Sullivan, 5-7, 6-4, and 6-1. Sidney Stapleton put one more Spartan, Lamar Bretton, into the defeat column with 6-3, 6-1. James Turner had to take it from the swift racket of Wilson Wilkes to the tune of 6-3 and 6-1.

In the doubles the results were not any better for the Tampans. Munch and Stapleton defeated Albert Day and Billy Laird with 6-3 and 6-1. In the other game Wilkins Smith and Alton Settles defeated Louis Sullivan and Lamar Bretton with scores of 5-7, 6-1 and 6-3.

At the best, the Spartans put in far too much travel yesterday for their good, was the opinion of Culbreath. It is probable that the next trips made by the netters will be to points not so distant. While it was hoped that the team would be able to stack up a fair share of the wins on the trip, this will not discourage the attempts of Culbreath and his charges to build up a tennis division of the athletic department that will rival the football and basketball teams.

### Judge Petteway Plans To Award Public Speaking Prize at Commencement

Judge W. Raleigh Petteway, Judge of the Criminal Court of Hillsborough County, in a letter to Mr. Hartzell, submitted a plan for Public Speaking competition to stimulate interest in that subject.

Judge Petteway urges a Public Speaking contest and desires to award a prize at Commencement in hope of increasing enthusiasm. He lauds training of speech and rejoices that importance of effective training along this line is being realized.

"I am naturally interested in the success of the University and also in the successful training of effective public speakers among the University graduates. The thought of offering this award by myself has been partly suggested to me because of the fact that I was accorded the privilege of delivering the address on the occasion of the graduation of the first graduates of the University of Tampa," Judge Petteway wrote in his letter to Mr. Hartzell.

"So you say the water that you get here at the fraternity house is unsafe?"

"Yeah."

"Well, tell me, what precautions do you take against it?"

"First we filter it."

"Yes."

"Then we boil it."

"Yes."

"Then we add chemicals to it."

"Yes."

"And then we drink beer."

## Distribute New Catalog This Week

The University of Tampa new catalog with announcements for the school year 1935-36 is being distributed in the Dean's office this week. This catalog counting 122 pages, gives definite information concerning the next school year. It also states that the University has enrolled 642 students during this school year and last summer session.

Among the new features of this bulletin is the announcement of the department of education. The work done in this department is approved by the state department of education for teacher certificate privileges.

A number of new courses are listed here, among which are school art, methods of teaching (primary, intermediate, and junior high grades), teaching reading, teaching arithmetic, teaching social studies, and other courses. Another series of courses with a new punch is that in geography. It includes social and economic geography and the geography of Florida.

Work in the university next term will be offered in two colleges, the college of liberal arts and the college of commerce and finance. The university this year adopted the junior and senior division system of organization, to be put into effect at the opening of the fall term. Junior division work will include the studies offered in the freshman and sophomore years, at the end of which an associate of arts certificate will be awarded. The senior division embraces the two advanced years. The summer school term will run for eight weeks and cover a semester's work. Courses will be offered for teachers and for regular students.

The activities fee for next year will be \$8. This fee covers membership in the athletic association with admittance to all university ball games played in Tampa, subscription to The Minaret, lyceum course, intramural activities, musical organizations, social activities, debates and dramatics, and the college annual.

## Plan Publication of Literary Magazine

Plans are being made for the publication in the third week of May of the first number of a University literary magazine in which will appear short stories, poems, reviews and articles written by members of the student body. If this venture meets with sufficient encouragement from the student body it will become a monthly or quarterly publication of the University, devoted to the upbuilding of a literary group interested in creative writing.

To stimulate interest in the new venture, the student body is urged to submit names for the new publication. To the originator of the winning name will go a free copy of the first number. The judges on names submitted will be President Spaulding and Dean Hale. The last chance that a student may have for submitting a name will be May 12, and Dr. Hinckley has asked that all suggestions be placed in his mailbox.

Similarly, all material that is to go into the publication must be in by May 12. It is expected that it will consist of about 50 pages. Many of the articles, already turned in by the English Composition classes, are already under consideration, but a contribution from any student will be welcomed. All material must be turned in to Dr. Hinckley.

A tentative editorial board has been chosen, including Horlense Boyd, George Kayton, Russell Smith and Edgar Andrews.

### PRESENT CLASS PLAY

The senior class of Hillsborough High School will present "New Fires," their class play, May 16, at 8:15 p. m. in the high school auditorium. The play, a comedy in three acts, is being directed by Miss Mildred Buck, who for several years has directed the senior plays.

1. The new catalogs have just been received. Each student is entitled to one of these catalogs. Any one desirous of obtaining one, please call at the Dean's office for it.

2. Examinations will begin on June 1. The attention is called to those students who are back in their work or who have other "conditions," that serious consideration should be given to making up this work before it is too late. All students should also complete their financial settlements as soon as possible since it will not be possible to take the final examinations unless the accounts are taken care of.

## Pan-Hellenic Council Plans Sororities, Fraternities To Give Luncheon for Seniors

The Pan Hellenic Council, meeting on Wednesday morning, made plans for a luncheon to be given by the fraternities and sororities for the Seniors on Class Day. The luncheon will be served on the porch of the University, and will be attended by the Senior class, as honor guests, and by as many members of the fraternities and sororities as wish to come. Those attending who are not Seniors will be expected to pay for their lunch. President Theodore Lesley of the Pan Hellenic appointed as a luncheon committee Julia Folsom, chairman, representing the Delta Kappa Sorority, Leila Gibbs, representing the Sigma Theta Pi group, and Jack Harding, representing the Sigma Kappa Nu's.

A portion of the Pan Hellenic constitution to be drawn up, that part which concerns rushing, pledging, and initiating by the Greek Letter organization. It was as follows:

Section 1. The rushing season shall open on the first Friday of the school year.

Section 2. Pledging by all the Greek letter organizations shall take place on the fourth Friday after the beginning of the school year.

Section 3. Pledges shall be initiated either at the end of the first semester, with twelve hours of "C," or at the end of the second semester with 24 hours of "C," being subject to the pleasure of each individual organization.

Those present at this meeting were: Theodore Lesley, chairman, Sigma Kappa Nu; Jack Harding, Sigma Kappa Nu; Anita Leonard, Sigma Theta Pi; Leila Gibbs, Sigma Theta Pi; Gladys Guthrie, Sigma Theta Pi; Margaret Williams, Sigma Theta Pi; Virginia Roberts, Delta Kappa; Julia Folsom, Delta Kappa.

## Many Advantages for Varsity Crew Here Nullified by Cost of Equipment

Those people of the City of Tampa and of the University who are interested in the athletic as well as scholastic progress of this school have been planning for the last year or so on the advent of one of the most distinctive and most beautiful of sports, crew racing. It is well-known by Tampans that this University has probably the most advantageous location in the South for water sports of all kinds, but, before we get too enthusiastic over our location and such possibilities as the splendid course along the east side of Davis Islands, let us look into crew racing itself and see just what this sport is all about.

It was not until the beginning of the nineteenth century that rowing ceased to be looked upon as a laborious task fit only for professional watermen. Oxford University can trace its rowing to the year 1812; Cambridge to 1827. The two universities first raced one another in 1829. These races and all other rowing events at this early date were carried on in in-rigged, keeled boats, and it was not until 1843 that outriggers appeared. At first they were used only at stroke and at bow seats, and it was not until 1846 that a ship with eight outriggers was made. Sometime later the keel was left off and a shell with greased seats was developed. This

## Battle of Signs in Lobby at Fever Heat

Unknown to many, a famous four-cornered battle is taking place in the lobby. The Battle of the Signs has been waxing fast and furious since the first of the week.

Four major companies are engaged in battle—the cohorts of Smiley, Logan, Giunta and one unknown party.

It so happens that there are more political signs than places to put them, and a vantage position is quickly besieged by the three companies. If one is victorious, the battle soon starts somewhere else in short order.

The fourth party then comes along, and, if the sign is close to a mirror surreptitiously removes it. Then the battle starts all over again.

No major casualties have been reported to the Minaret, but all are waiting hopefully for Monday, when all will be quiet on the lobby front.

## Biographical Sketch Of Candidates for Office of President

William Logan, Jr., was born in Meridian, Miss., in 1915. He attended Plant High School, where he was a member of the National Honor Society—graduating in two and one-half years with honors. He entered the University of Tampa in 1932, where he is working for a B. S. degree. He was president of the Spanish Club at one time, was ex-president of the Beta Chi fraternity, and is now a member of the Sigma Kappa Nu fraternity. He has held the chairmanship of the University Election committee for the last two years. Bill is a member of the Tampa Little Theater, and has appeared in several plays. A yachting enthusiast, he is secretary of the University Yacht Club. At present he is building a sloop in which he will cruise to the Windward Islands this summer. He earns his tuition by working at the Lumber Storage Warehouse, where he has been employed for the past three years.

John H. Smiley first saw the light of day at Crescent City, Fla., in 1914. He attended high school at Pierson, Fla., where he was valedictorian of his class. While there he obtained letters in baseball, track and tennis. Entering the University of Florida, he became a member of the Delta Chi Fraternity and the Serpents, honorary society. From there he went to Oglethorpe University where he became affiliated with Zeta Upsilon, honorary fraternity, and was manager of intramural athletics and assistant sports

## POLLS OPEN HERE TODAY IN ANNUAL STUDENT ELECTION

### List of Candidates Larger Than Usual

The polls will open here today at 10 o'clock to begin a lively annual election of nearly all student officers who will serve throughout next year. Election day, falling on the second Friday in May this year, should give university students plenty of excitement. Being the most important political event of the year, all eligible students are expected to participate in the voting in order to give the university a well-selected set of officials for next year.

The election committee reports a list of candidates larger than usual. Petitions, which were making the rounds furiously during last week, have placed many well-known students in the running. To aid the students in making their choices, a special assembly was held yesterday, presided over by D. B. York, president of the student body, to allow the three candidates for president of the student body to make speeches and to introduce all of the other candidates.

Candidates for president of the student body, three this time, are: William Logan, John Smiley and D. V. Giunta. Due to the vigorous campaigns for this post, a real struggle is forecast. The office of vice president of the student body will be automatically filled by the person elected this time as president of the senior class.

Next year's Student Council will be formed by the election today. There are eight nominees for representatives to the Student Council from the three upper classes. From the senior class there are Kitty Lea, Charles "Chill" Moore and Torino Scaglione. Junior class: Annie Maggio and Adolph Ramirez. Sophomore class: Placido Fernandez, James Lindsay and Ray Newell.

Competition for the various class offices is a little low; the nominees are:

President senior class: Winston Fowler and Carmen Cosio. The offices of vice president and of secretary and treasurer have no nominees.

President junior class: A. C. Van Dusen, Jack Harding and Manuel Ramirez; vice president, Dorothy Talbot; secretary and treasurer, open.

President sophomore class: Spencer Burress; vice president, Edna Johnson; secretary and treasurer, Margaret Hitchcock.

Where there is only one person nominated for an office, he will be declared elected unanimously.

The officers for the freshman class will be elected early next year along with any other officers that might be lacking due to a failure of someone to return to school. All the offices of the upper classes for which there

(Continued on Page 4)

## 100 Campaign Stogies Are Surreptitiously Lifted From Den of Smiley Cohort

Four boxes of five (5) cent campaign stogies destined to grace the lips of the ardent supporters of the Smiley campaign were surreptitiously removed early this week from the "rat-hole" residence of John Edison where they had been carefully interred in a battered trunk awaiting the psychological moment for distribution. Donated through the courtesy of the Cuesta Rey Cigar Manufacturers, and through the tireless efforts of Decon Rhines and Edison, the cigars were to fulfill the time-honored custom of the passing of the smokes to prospective voters. But alas and alack, after procuring the five (5) cent cigars Tuesday morning, that afternoon, a few short hours after depositing them in the trunk, they returned only to find a smashed in panel and an uninhabited trunk.

Nothing daunted, the lads have sworn swift vengeance on the unknown culprits and set about replacing the five (5) cent cigars. The supporters of Smiley shall not go smokeless!

## Do College Girls Make Bad Wives?

That "a college woman when she becomes a wife makes more trouble than all the other classes of wives put together," is the belief of Dr. D. P. Wilson, of the Los Angeles Institute of Family Relations, as quoted in the Golden Book.

With all due respect to the erudition of such an eminent sociologist and pessimist as Dr. Wilson, we are forced to observe that he has not substantiated his statement with the facts for which his "science" professes so much devotion. It would be most difficult to accumulate statistical data to prove a relationship between marital troubles and college training. Divorces, like education, are more prevalent in the upper economic levels of society, but so are automobile accidents and soap.

A specialist in a clinic such as the Los Angeles institute is in a poor position to make conjectures in such a comparison. It is reasonable to suppose that when a college woman got into a marital tangle she would be more cognizant of the possibility of help from a scientific source, while her uneducated sister would rush to a divorce court. Also there is the legion of women whom the fear of economic insecurity holds in submission to unhappy home life. For these two reasons it is quite possible that the large proportion of institute clients may be college women.

It is not assumed today that the college girl is a "blue stocking," an intellectual, or in any way diverted from normal womanhood. She should be more, not less adaptable to difficult situations. College training should help her to deal with family life in an impersonal and objective manner rather than to rely on emotional impulse.

While making no unequivocal statement, we would venture a guess that the beautiful but dumb girl is more likely to cause marital friction than the college graduate, and to suggest that Dr. Wilson support his ex cathedra enunciations with statistical data before venturing to damage the reputation of feminine education.

## Caps And Gowns

In the last assembly before the end of school, on Tuesday, May 29, the Seniors will at last appear in their caps and gowns. At last the long-looked-forward-to blessed event will blossom forth. This appearance of the Seniors in their academic attire may seem to most of us like just another innovation into our fair institution. But in reality it is of greater portent than most of us imagine. Since the founding of the University, we have had shouted into our ears from all sides that word "tradition." At last some have been grown. Every Senior class of every school and college has some privileges and honors, to distinguish it as a Senior Class. Heretofore our Seniors have been honored by nothing. Now at last they are distinguished. At last they can be pointed out undeniably as Seniors. They are honored. They should be pleased. Pleased also should they be at the fact that the annual formal dinner given by the University will be given this year entirely for the Seniors and Juniors, and also at the fact that the Pan-Hellenic Council is planning a luncheon for class day with the Seniors as honor guests.

These traditions innovated this year will be a great boost to the Senior Class of this year as well as to those to come. At last, the Seniors ARE Seniors.

## Selfishness

After much observation by the writer of himself and his friends, he has concluded that selfishness is the predominating human failure. Few and far between are those who are entirely free from this bane of the existence of mankind. Selfishness is often obscure, but, thinking back carefully, one can trace almost every crime, every thoughtless act, every hurt feeling, to selfishness. Most of us go places to have a good time. If the others in the party do not enjoy themselves, we blame it on them, not on us. But it IS our fault. We could have helped them to have a good time. If one who is not enjoying himself does not mingle well we can by friendly conversation help him to overcome his inferiority complex. If dancing is prevalent, and some guest can not dance, we can help him find other amusement. If he does not know the rest of the crowd, we can easily take a few minutes of our time to introduce him to the other guests. What a pleasurable feeling it gives us to know that we are helping someone to have a good time. There are countless instances in which we could, with a little effort, step on this jack-in-the-box, Selfishness. Being kind and courteous to older people, assuring the comfort of the chaperone, staying at home if it would please those at home, treating friends with kindness and thoughtfulness, driving our cars with respect for other drivers, and many others are easy things to do if we will only stop in our mad rush and think. Thoughtfulness is synonymous with unselfishness. If we would only stop and think!

## Public Opinion

Whether right or wrong, public opinion is a powerful and dangerous machine. It tramples over great and small at will. It can build or destroy. It can change lives, form destinies, start wars, annihilate races, kill men, make them wealthy, make them poor. It has the power to pave streets, build airports and battleships, change the price of bread, establish customs, make laws, break down morals, and pass judgment on countless other things. It can detect and punish grafters, it can rise in arms against disdainful, dishonest, selfish "inner circles" of administrative offices. It can put men out of office, ruin their reputations, and make them unable to get honest employment again.

The life of the University of Tampa depends upon the public opinion of Tampa. Will that opinion annihilate or support the University? It requires that each and every member of the administration and of the board of trustees cooperate with the faculty and students of the University of Tampa to make Tampa's public opinion what we want it to be, in order that the school may prosper.

## Brothers and Sisters

Tuesday night at the regular meeting of the Sigma Kappa Nu's officers for the coming school year were elected as follows: President, A. C. VanDusen; Vice President, James Pollard; Secretary Winston Fowler; Treasurer, Jack Harding; Parliamentarian, Theodore Lesley; Sergeants-at-arms, Walter Hoy and Louis Sullivan. Winston Fowler and A. C. VanDusen were elected delegates to the Pan Hellenic Council.

New members of the Sigma Theta Pi sorority entertained old members at a party Friday last at the home of Mr. and Mrs. Mabry Sumner, 925 Shadowlawn. Dancing was a main part of the entertainment and refreshments were served at a late hour.

At the regular weekly meeting next Tuesday night election of officers will take place at the home of Miss Helen Aronovitz. All members are urged to be present.

A "Kid Dance" will be sponsored by this sorority May 17 in the University Ballroom. One-half of the dance will be "Whoopee" style while a floor show will take place during the other half.

Lollipops are going to be given away and lemonade will be sold for two cents a cup. Please bring pennies and cups.

Everyone is requested to attend in costume as a prize is to be given to the cutest couple.

Hostesses for this affair are the Misses June Grant, Anita Leonard and Helen Aronovitz. Dick Marion will furnish music.

Members of the Delta Kappa Sorority will elect officers in the near future for the school year 1935-36.

A swimming party is being planned to take place Saturday a week at Sulphur Springs. Members will meet at school and drive to the springs where swimming and a picnic lunch will be enjoyed.

## Campus Chips

### TRIUMPH

Many times I've often thought  
About your future, and after thinking,  
Rue old Destiny who dares, over-  
wrought,  
To let your heart mature, and you  
shrinking,  
Haven't the courage to oppose your  
host—  
And always the battle not fought is  
lost

Over is your fight with Destiny,  
With life it's just begun,  
Eternal love, weapon of effeminacy,  
Noble thoughts, and happiness is won.  
Silent was defeat—Silent now, Su-  
premaccy.

ROBERT E. MORALES.

### LOVE SONNET

Borne on a litter of the rudest sort,  
Fashioned from branches of some  
thorny tree,  
They bear my lifeless body home to  
me  
Who sit and stare, and mumble,  
crazily,  
Old tales I heard in some far distant  
port,  
Or mime the death-note of the hunt-  
er's morn;  
And I who could not ever bear to kill  
The least-loved tenant of this teem-  
ing earth

Look on my death with an unholy  
mirth,  
And claw my eyes out, and bemoan  
the death  
Of any breath to steal, or blood to  
spill  
From this cold corpse that once was  
lovable.  
My living fingers touch on my dead  
hand;  
I think of love, and cannot under-  
stand.

RUSSEL ST. CLAIRE SMITH.

### WIND SONG

I wonder why the wind wails as it  
passes,  
It's free to move the tall, thick, mead-  
ow grasses,  
And wander in the forest's leafy  
maze—  
It has no barrier of time nor days.

I wonder why it whistles, now so  
jolly;  
Then suddenly is moaning, melan-  
choly;  
Now soft it whispers, now it fiercely  
roars  
And roams the frost-packed land of  
out-of-doors.

EDWARD PLUMMER.

### GENESIS OF A DATE

(after Tennyson)

Who is that? and what is there?  
And in the darkened roadway near  
Was parked a roadster of high gear  
Which beckoned strong to hold good  
cheer

For both the heart and head;  
And Reginald slowed down his pace;  
He said, "She has a desirable face;  
I'll stop and give her ample chase,  
This tropical co-ed."

G. K.

## Down the Corridors

### By BILL CULBREATH

Week ago six wild-eyed, be-whiskered, tattered, torn human derelicts wandered into a group of tattered, torn, dyed, not so wild-eyed, not so be-whiskered University students who had gathered on the deck dance floor of the Yacht Club to dance, make merry and swap ship wreck yarns.

Blurted their leader, "Members of crew and passengers... good bark Fido... Ninety days out of Hong Kong... ran aground on dreaded Hershey bar... swam for three days... landed on cannibal isle... ate turtles, goats, seaweed, bananas, cannibals, fish... kept records in ink, pencil, blood on shirt front... pass the rum... having a darn good time... when are we going to have another?"

Fortnight ago hundreds of high school musicians stormed into the University, took every available big room, filled air with harmony, brought joy to Tampa's music lovers, publicity and students to the University of Tampa. To most students the Festival was a joyous week-end of good times, to one past middle aged man who sat sad-faced through many recitals it was the realization of his youth's dream, said he, "I have carried into my adult life carefully hidden illusions which never materialized. Among these is a desire to make music in some form. This idea persisted through the years until last year your music festi-

val led me to investigate its dynamic origin and value. I started to learn the piano and as I progressed I felt strongly an emotional liberation on a wholesome cultural plane that has given me a new objective of great inspirational and constructive value. Music and the appreciation of music has given me the always sorely wanted zest to continue to believe in my own reason for existence and has given me a great desire to 'fight the good fight' to the end."

Ye Spartan Solarium, famed ultra violet spot of seclusion where male students acquire beechy browns during their spare hours has turned into a refugee station for inhabitants of athlete's attic. Any night finds the hardy one braving rain, dew, pneumonia, and mosquitoes for a night's rest away from sulphur dioxide filled rooms.

Spring cleaning revealed that the discarded name "rat hole" was most appropriate but not broad enough to cover the variety of insects that had made the "rat hole" their home. With no Pied Piper available the molested Spartans waved a beckoning hand at science, burned pounds of sulphur in crack stopped rooms, quitted their soft beds for the less comfortable Solarium resting places. "It's a fight to the finish," cried a determined Spartan, "after this week there will be no justification for the title 'rat hole'."

Baton Rouge, La.—Jesse H. Cutrer, 19-year-old journalism student of Louisiana State University, who resigned as editor of The Reveille, campus paper, after being told that the paper must not criticize Senator Huey P. Long, was dismissed from college by Dr. James M. Smith, president of the university. David R. McGuire of New Orleans also was dismissed. They have made public sworn affidavits concerning censorship of The Reveille.

"The Sara, a tribe in Central Africa, averages 5 feet 11 1-2 inches per adult male, and this is the only listed group, which surpasses the Harvard average of 5 feet 10 1-10 inches. Harvard men have been growing taller at the rate of one inch every thirty years and heavier at the rate of six and one-half pounds per thirty years."

Gordon Townsend Bowles, Anthro-  
pologist.

What is the matter  
Who is to blame?  
If you've forgotten my kisses,  
And I've forgotten your name...

Many girls are looking with sad eyes towards the coming holidays... for it means that their "one and only's" are leaving for at least three months... maybe more. Pou is looking very sad now that Eddie has returned to South America.

Rumors have some thought that Brooks "T.G." Owens went religious the other night out at Las Novedades with "Beulah Land"... Maybe neither he nor Eugene Hubbard remember much about it! While on this subject, a certain young Universityite was admitted to the Rooks dance because the doorman figured he'd fall over soon enough anyway.

Big news on Lucian King's spring holidays... He and Billy Laird went to Micanopy... Luke went for the blondes in a big way (or vice versa) and he didn't lose time while drying dishes! Believe he set a record around here... There seems to be a "Blackberry Bush" at the end of "Dead End Lane"—and Luke certainly has developed a taste for them... However, they won't be ripe till June... Billy Laird's cousin Ann will come here to visit soon... Both Luke and Bill Reid will be waiting for that day, but which is she coming to see? Say, Luke, what excuse did you give that girl in Lakeland for being three days late for your date?... and just what does Evelyn say about it all?  
Wotta man, Luke!!!

Roddy Rodriguez is being seen many places with June Grant, but still he seems to be making time with Beatrice Youmans as well...

Steve Sanford is practicing his interpretations... The other night he pretended to be a German sailor while riding a tricycle... The outcome hasn't been learned yet... For Onita West's sake please don't go to Germany, Steve...

McGuck seems to be one of the finest if bookstore opinions amount to anything... And they must for McGuck has an inexhaustible supply of "cokes," chew gum, and candy!!!

Correction: It was a brunette and not a blonde in the blue coupe... sorry for the mistake of the last edition... Misinformation...

Three cheers and congrats to the Rabbi. ! ! !

How many times did James Galbraith go up to Room 408 during the Printers Conference at the Floridan?

The Annual University Picnic was "of the finest"... More fun... The only thing missing from last year was King Kong singing "The Man on the Flying Trapeze"... Many attended and sports were the main things! Tough that the band and tennis team had to be out of town.

Where did you get that eye, Anna? The story's good, but was it Edna Johnson that tried to "bump you off?"...

John Traina is still faithful to his last year's love... a nurse now and a long ways away... Cheer up, John, the summer is the best time for hitch-hiking...

Bill Hand, champion under-water swimmer, is ga-ga, goo-goo, daffy and nuts about a "banged" frail that goes by the name of Roma Cassidy... and so—what's the outcome?

Last year it was "Boodling," now it's "smooching"... Goot in Himmel, vat next?

Monkey Rhines is doing very well... A certain girl has polished up her rusty hook, but has so far nary an idea of a thought of a bite from him... Guess he dreams of Mims continually... And who blames him? The fact that the femaled waited too late to ask people certain places may have ruined that love-affair... Who was the girl who slept all week-end at the D.K. house party?

Due to various and sundry and as yet unexplained causes, the extended (?) "courtship" of Miss Margaret Gourlie, party of the 1st part, and one Mr. Hercules Hoy, party of the 2nd part, has been torn asunder and the asunder, and the parties enumerated above, are once more as individuals... Miss Gourlie, of the 1st part, however distraught and careworn she may be, is gathering no moss nor letting any sandspus blossom beneath her dainty feet. In fact she seems to be doing fine, thank you (says she). As for the same Hercules, he is doing up the situation in the finest possible manner... a free man again... No sympathy is needed for him... So it's farewell between Hercules and his grown-up (?) Gourlie...

## McPherson, Golf Pro Would Start Student Golf Classes Here

McPherson, professional golfer at the Rocky Point golf course, who has been assisting students of the University of Tampa to learn to play golf and those who know how—to play better, has expressed a desire to go to greater lengths in helping students to become interested in golf.

Mr. McPherson would like to see the development of a golf club here. Knowing that there are a large number of students actually interested in golf from his previous experience with them, it is probable that if enough interest is shown that he will come to the university and reorganize the present golf enthusiasts. Others that may decide to enter the training will add just that much to the success of the golfing part of the athletic setup.

Providing enough students are interested, he will teach them without charge. If the interest is very keen, Mr. McPherson will continue golf tournaments and free golf throughout the summer. These tournaments will be in different forms including handicap tournaments in which everyone will have an excellent chance to win even if his rating is poor.

Students are asked to keep the offer in mind and be ready to respond when notices are placed on the bulletin board at an early date.

## Ramirez Places Second in Siac's Annual 6-Mile Run

Manuel Ramirez, of the Pi Epsilon aggregation stepped out of the intramural circles to capture second place in a record breaking six mile marathon which was sponsored here last Sunday by the Siac Athletic club of West Tampa. Peter Monteleone, who set the pace at 34:16 minutes, led the only university representative by 15 yards.

The event was re-run last Sunday after the first race, which was taken by Manuel Ramirez, ended in confusion several weeks ago. The marathon proved to be a three-cornered affair between the winner, the university entry and Ignacio Menedez, who passed out 50 yards before the finish.

The race was the Siac club's third annual six-mile marathon and the record for the course is the time set by this year's winner.

## Diamond Ball Loop Led by Undeclared Pi Ep Outfit

With the first round of play practically completed in the intramural diamond ball league, the present standing of the five teams is as follows, not including yesterday's tilt between the Sigma Eps and Omega Kappas:

	W. L. Pct.
Pi Epsilon	4 0 1.000
Sigma Kappas	4 1 .800
Omega Kappas	2 2 .500
Sigma Epsilon	1 3 .250
Plebes	0 5 .000

Due largely to the superb twirling of long John Traina, the Pi Epsilon aggregation has yet to taste defeat. Winners last year and holder of most intramural honors, the Pi Eps are favorites to annex the diamond ball title for the second successive year.

"Can you love two girls at once?"  
"Yes sir, immediately!"

## You Will Find The Office Equipment Co.

"Outfitters from Pins to Safes"  
721-723 Florida Ave.

An ideal place to purchase your stationery and school supplies. We are exclusive agents for the new spiral notebook, the A. B. Dick Mimeograph and also the Ditto and Hectograph machines. We also have a large line of scrap books, school Memory Books, and Engineers' and Architects' supplies. We also carry in stock a large assortment of Sheaffer and Parker lifetime fountain pens.

You will be wise if you try us first for anything you may need that comes under the heading of stationery and office supplies.

## SPARTAN SPORT VIEWS

By CHILI MOORE

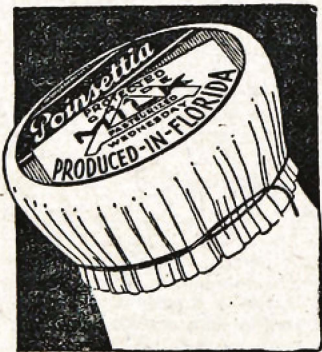

Well, boys, diamond ball is here in all its fury. Many very excellent games have been played and many naturals are in the making. A couple of young rookies have been making diamond ball history in the university league; Mr. Sparkman, of Pi Eps, who has been taking toe-holds and slapping that mush ball into right oblivion and Mr. Traina, who is the Dizzy Dean of the University league with several wins and no losses.

And speaking of diamond ball reminds us of a very amusing incident which happened in Coach Higgins' office in 1933-34. We were talking to coach about our chances of entering school here. He suggested that we report for football practice early in September. We informed coach that that would be impossible as we were taking a diamond ball trip to Milwaukee where the National diamond ball tournament was being held. Well, then and there we received a fanning we won't forget! However, we have it on good authority that coach's opinion of diamond ball has changed.

It is rumored that many of the football players who withdrew from school at the semester will return for the summer session to meet the eligibility requirements for next year. The coming elections clearly point out that many football players still here will have to attend the same session to meet the same requirements. Well, elections have to be good for something, you know.

Did you know: That Manuel Ramirez won the five-mile marathon held recently and has a nice trophy for his trouble . . . that Wilbur Gunnoe has hung up his football uniform forever and ever . . . that C. Farnell is the champ heavyweight wrestler and R. L. Stevenson is the champ heavyweight boxer of the school . . . that Phil Patterson is getting more radical every day . . . that this column picks Pi Eps to win the diamond ball championship . . . that "Monkey" Rhines once ran the hundred in 9.9, which is lifting 'em up and laying 'em down . . . that due to the favorable location of the Hillsborough river the university is contemplating the organization of a crew next year . . . that a six-day bicycle race is in the making . . . that there will be two teams with 24 men on a side and each man will ride an hour a day. The track will cover a five-mile portion of town.

Conductor: Can't you see the sign says "No smoking?"  
Gob: Sure, mate, that's plain enough. But here's another dizzy sign that says "Wear Nemo corsets," so I ain't paying attention to any of them—Annapolis Log.

## Sigma Kappas Fail To Solve Traina, Lose to Pi Eps, 8-1

The Pi Epsilon diamond ball team took an undisputed lead of the Intramural League last week by pounding out a convincing 8-1 victory over the highly-rated S. K. N. Fraternity outfit. Long John Traina, the Pi Eps star tosser, took matters into his own hands at the beginning of the game and completely tamed S. K. N.'s heavy hitters. Traina was in almost perfect form, and his fast underhand pitches and curve balls were very effective, allowing his opponents only three widely scattered singles and fanning 14 S. K. N.'s. Adolf Ramirez, Traina's battery mate, and leading hitter of Pi Epsilon, led the hitting by punching out a pair of hard-hit singles that brought home three runs. Burress, S. K. N. third sacker played a fine game on the field. His spectacular catches many times kept Pi Epsilon from scoring.

## MOTHER'S DAY PROGRAM AT ASSEMBLY

A Mother's Day program will be given in assembly on Tuesday, May 14.

It will be in charge of Dr. Metts. He has arranged a talk by Mrs. R. A. Clark, who is president of the Florida State War Mothers' association.

She will speak on the relationship that should exist between a college student and his mother, and also, how he may cooperate with her and still develop individuality and independence.

## Council Minutes

May 2, 1935

The meeting was called to order by the vice president, Louise Leonard. The minutes were read and approved.

Winston Fowler, chairman of the Minaret Investigation Committee, reported that his committee has written to several other colleges regarding the method by which the student paper is run, and that as soon as these letters are answered that the committee will be able to give a definite plan for operation of the Minaret next year. Then followed a discussion. The Council then voted unanimously to present to Dean Hale a list of persons eligible, in the eyes of the Council, to serve as Editor and Business Manager of the Minaret for next year. Those names decided upon were:

Editor—Bill Miller, Edgar Andrews, Edna F. Prince, Lucian King, A. C. Van Dusen, Lyman Meares.

Business Manager—Winston Fowler, Jack Harding, Dot Talbot, Manuel Ramirez.

In the election of Editor the one receiving the second highest number of votes shall become Associate Editor.

Billy Logan then presented his resignation as chairman of the election committee, as he is running for office. The following were then suggested to take his place on the committee, Logan himself being appointed as an ex-officio member: Spencer Burress, Cecil Bernard, Harvey Van Slyke.

After a vote was taken, Burress was named as the fifth member on the committee and Van Slyke and Bernard as alternates.

Vice President Leonard then appointed Searcy Farrior and Theodore Lesley to draw up plans for cheerleaders' letters.

The meeting was then adjourned.

Forty years' study at the University of Lhasa, which is in Tibet, across the border from India, is necessary to win a first-class degree there. For one of the ordinary degrees one must study twenty years.

From "A Conquest of Tibet" by Sven Hedin.

## Sigma Eps Break Into Win Column, Down Plebes, 19-8

The Sigma Eps broke into the win column of the intramural diamond ball loop for the first time last week, but they did it in such a way that the memory will not soon be erased. Launching a concerted attack on the Plebe twirlers in the first inning they continued their assault until the dust settled in the seventh inning, scoring in each stanza but the sixth. The 19-8 triumph, one of the few free scoring affairs this season, was the fifth straight loss of the Plebes, and was featured by the stick-work of Bryan, Sigma Ep first sacker, who had a perfect day at the plate with five hits.

The box score:

Sigma Eps	AB	R	H	PO	A	E
Miller, 2b	3	1	1	1	3	0

## Possibility of Crew Racing Nullified

(Continued from Page 1)

and there are efforts now being made to re-establish racing in their athletic program.

Now let's see what this has to do with the University of Tampa.

Certain prominent citizens of Tampa who have the interest of the University at heart have been working for the past year in attempt to secure for us the funds necessary to the inauguration of this sport in Tampa. Racing is expensive. Shells cost from twelve to fourteen hundred dollars apiece, and, unlike the years before the demon Depression struck us, they cannot be bought secondhand, for even the larger schools are finding it necessary to patch up their old shells and reduce expenses. Shells may be bought in England for as little as \$900, but after shipment to this country can only meet local builder's prices. Oars cost as much as \$25 apiece, and every other piece of equipment is correspondingly high in price.

It is therefore impossible at present to issue a call for candidates for a varsity crew, hand them their material, and say "Play ball!" What can we do about it?

During the past few weeks there has been an awakening among our student-athletes to the beauty of our waterfront, and to its adaptability to rowing, racing, and boating. Challenges have been made between fraternities, plans laid for relay races in intramural athletic groups, and other examples of interest and appreciation have been forthcoming. It is the intention of these groups to resort to the borrowing of gigs, life-boats, row-boats, water-wings, or anything else that comes in pairs, in order to carry out these plans. All that is lacking at present is the lender.

Until such time as the University is able to furnish equipment for this sport so that we can enter into a racing league with the other Florida Colleges and possibly the Havana Yacht Club, we can only prepare our raw material—our green but enthusiastic crewmen—and take a real interest, find real enjoyment, in our wonderful waterfront and our makeshift substitutes.

## University in Turmoil During Two Days of Ninth Music Festival

For a few days after the close of the Music Festival and the parting of its many participants, our university seemed unusually quiet and sparsely populated. This is the second year that T. U. has entertained the festival, and our student body was happy to greet the infusion of its high school friends and regretted to see them go.

The Music Festival lasted two days the final group contest being held in the Municipal Auditorium before a packed house of students, visitors and townspeople, with winners of several solo events performed as entertainment between the contests.

The second day's events opened with contests held in various rooms of the university and in the auditorium, and the festival, mostly attracting the contestants, visitors and music lovers of Tampa, was taken to the downtown section in a colorful parade of 10 high school bands led by the university band. Thousands lined the main downtown streets as the parade passed.

The afternoon's program consisted mostly of group and ensemble contests, but the larger groups competed in the concert Saturday night.

The final concert, the climax of the entire festival, presented high school students from all sections of the state at their best, with winning individuals in several events interspersed to add variety to the program.

The bands winning first, second and third place were Ocala High School band, Bradenton band and Sebring band, respectively. Contest winners in individual activities are too numerous to mention.

Student: I'll stand on my head or bust.

Gym Instructor: Never mind, Miss, just stand on your head.—Iowa Frivol.

"Pop, will I look like you when I grow up?"

"Everybody seems to think so, son."

## Meares, Fowler Are Speakers at Meeting Of Science Club

The regular monthly meeting of the Science Club of the University of Tampa was held last Monday night, May 6, in the Geology Lab.

This meeting was the first one held since the initiation of new members and associate members and President Van Dusen extended a welcome to them before turning the meeting over to the feature speakers of the evening.

Lyman Meares, first speaker on the program, talked on the most important development in photography since the invention of photography. This is, "Kodachrome," a new film that makes possible the showing of moving pictures in absolutely natural color. After giving a thorough description and excellent illustrations, Mr. Meares concluded by saying that this invention, because of its perfect efficiency and its low cost will revolutionize the present methods used for making movies.

The other speaker on the program was Winston Fowler whose subject was the origin and historical development of the chemical symbols. He traced their development from their crude form as Egyptian hieroglyphics through their change as a result of the invention of the phonetic symbols up to their modern form.

Much lively discussion followed at the conclusion of both talks and many interesting comments added to the enlightenment of the subjects.

## SKN's Rally in 7th To Down Plebes, 12-3

Sigma Kappa Nu came from behind in last Tuesday's game to trounce a hard fighting Plebe team, after trailing by one run until the last inning. Ingram, S. K. N. first baseman doubled to center field to begin the rally and before the side was retired, the fraternity lads had crossed the plate 10 times. The Plebe defense crumbled to pieces in this hectic seventh inning to put a sudden stop to the pitching duel between Burress, of S. K. N. and Cantrell of the Plebes. Harwell led the winners at bat with a pair of slashing two-baggers to left field. For the Plebes Bennie Lopez solved the pitching for a single and a long homer to deep left.

### INTRAMURAL TRACK MEET

Due to the postponement of the swimming meet the intramural track meet, originally booked for tomorrow, has been scheduled for Saturday, May 18. By popular request the following events have been added: Javelin, mile run, half-mile. This makes a total of the following events: 100-yard dash, 220, 120 low hurdles, shot, discus, high jump, broad jump, javelin, discus, half-mile, mile, relay. Sign up for these events on the bulletin board and do so immediately so that heats may be figured for running events. See Hiller Adams for eligibility rules and number of events allowed for each participant.

## Caps and Gowns Ordered, Academic Procession Is Scheduled for May 29th

At last the caps and gowns have been ordered. The long looked-forward-to event is about to take place. On May 29, at the last assembly before the end of school, the faculty members and the Seniors will have an academic procession from the school to the assembly, starting from outside the geology lab and going all around the building and over to the Auditorium.

In the next issue of the Minaret will be a category of the order in which the Seniors will march, according to the degrees which they will receive. This is an event which has long been looked forward to with interest, establishing one of the first traditions which belong entirely to the Seniors.

## Biographical Sketches Of Leading Candidates

(Continued from Page 1)

editor of the "Petrel." At the same time he organized and served as first president of the Florida Club. Smiley entered the University of Tampa the first term of 1934. An honor-roll student, he has participated in many intramural sports. Smiley is working for a B. S. in the College of Commerce. Interested in all kinds of athletics, he holds the distinction of being the only student in school who has attended every inter-collegiate basketball game of the past season.

Dominic Giunta is a Tampa boy. Hailing from Hillsborough High School, he there belonged to the Quill and Scroll, and for two years worked with the Red and Black. He entered the University of Tampa when it was called the Tampa Junior College. Dominic was a member of the first staff of the Junior College Bulletin, and in 1933 was a member of the Junior College Publicity Committee. His hobby is reading, and intends to make his life work a combined career in law and accounting.

Good luck to you all!

## Pi Eps Finish First Round Unbeaten, Traina Fans 46

By turning back the short-lived threat of Omega Kappa last week, the smooth Pi Epsilon team completed its first round of competition without tasting defeat. The unbeatable battery of John Traina and Adolf Ramirez was functioning well, and with fine support from their team mates, they had the situation well in hand for the afternoon. Three scattered singles was all that the Omega Kappas could collect from Traina's invincible pitching. He fanned eleven batsmen, which gives him an enviable record of 46 strikeouts in three official games. Swendiman, Traina and Adolf Ramirez each contributed two hits to the bombardment on Bob Ferguson, Omega Kappa pitcher. Phil Patterson was outstanding on the field.

## Polls Open in Annual Election

(Continued from Page 1)

are no nominees will be filled by appointment by the Student Council.

Almost three weeks ago, the Student Council chose the Election Committee which is supervising this election and will also supervise all elections for the coming year. Those chosen were: Jeanie Trice, who is chairman, Earl Lines, Webster Faulkner, John Holton, Harvey Van Slyke and three members of the faculty. Three students, formerly on the committee, Spencer Burress, Kitty Lea and William Logan, resigned when they announced themselves to be in the race for an office.

The polls will close tonight at 8:30. Throughout the day there will be at least two members of the Election Committee, one a faculty member, in charge of the voting. After the polls have closed, the committee will count the ballots in public and submit to the Student Council a checked, certified copy of the results. The Council will announce these results.

Qualifications demanded of the candidates were that they have a semester grade of an average of "C" for all subjects and that they must be carrying at least 12 hours at the time of nomination and must carry at least 12 hours to continue holding office.

The qualifications of voters are:

A student must be carrying enough hours to be classified as a sophomore at the end of the regular school year in order to be eligible to vote for sophomore class officers.

A student must be carrying enough hours to be classified as a junior at the end of the regular school year to be eligible to vote for junior class officers.

The same holds true for seniors.

Any registered student will be eligible to vote for the President of the Student Body. This includes, of course, even the seniors.

### SUMMER SCHOOL COURSES LISTED BY DEMAND

One-hour, two-hour, and three-hour courses will be offered at the eight weeks University of Tampa summer school this year. Nine hours is the maximum number that any one student can take. The student body is at present determining the demand for specific classes by listing on blanks the classes they want offered. If a sufficient number of students desire a class, that subject will be given.

In the past, the summer school was made up mostly of Tampa School Teachers. The school welcomes these students and has proved a great help to them in securing their higher degrees. However, this year, the faculty believes that a large number of the winter university students plan to attend.

### AFFRONT TO THE COUNTRY

The winning gag in a joke contest conducted by the Minnesota Ski-U-Mah was this honey:

"Are you psychic?"

"Yes, seer."

The state of Minnesota has been asked to withdraw from the union.

california pelican

"What's the difference between Will Rogers and Joe Penner?"

"I dunno."

"One's unconsciously funny and the other is just unconscious."

colgate banter

It seems that an American film actress was applying for admission to a college and was filling in her application with the dean.

Dean: Unmarried?

Actress: Well, occasionally.

chicago phoenix

"Why the toothbrush in your coat lapel?"

"It's my class pin—I go to Colgate."

temple owl

## New Fraternity Is Organized Here by Latin-American S

A new organization, Rho Delta, composed mainly of Latin-American students was formed here recently and is now petitioning for a charter to become a full-fledged fraternity. Mr. Louis A. Nava, instructor in Spanish, will be the sponsor of the organization.

The new organization, following the order of the Sigma Iota fraternity at the University of Florida, has set up its constitution and elected the following officers for the 1935-36 term: Torino Scaglione, president; Dominic Giunta, vice president; John Traina, secretary; Adolph Ramirez, corresponding secretary; Louis Diaz, treasurer, and Leo Bottari, sergeant-at-arms.

The purpose of the new club is to develop a spirit of friendship among the students of foreign parentage and to encourage the Latin-American students of Tampa people to attend the University of Tampa. It also hopes to extend a friendly hand to students of Central and South America and to urge them to attend the university.

Athletics will also be stressed besides the regular social and scholastic functions of a fraternity. (At present it has in its membership nearly all of the Pi Epsilon Athletic club. Plans are under way for an installation of officers to be followed by a smoker to which the faculty of the University will be invited.)

The latest issue of the University Bulletin included the Rho Nu Delta as one of the petitioning student organizations.

Members of the new club include: Torino Scaglione, Dominic Giunta, John Traina, Adolf Ramirez, Louis Diaz, Leo Bottari, Anthony Bottari, Ray Dominguez, Louis Martinez, Hugo Goodyear, Placido Fernandez, Teobaldo Zacchini, Robert Tramontana, Charles Sierra, Manuel Ramirez, Armando Valdes, Delphin Acosta, Michael Cantounias, Benigno Miyares and Mr. Louis A. Nava, sponsor.

## Final Play of Year Being Rehearsed Now By Dramatics Club

The dramatics club, under the direction of Mr. Daniel Fager has made a great deal of progress this year. Their next engagement is for the middle of this month, at Port Tampa, where they will appear before the Parent-Teacher association with "Through the Keyhole."

During the past year the club has given four full evening plays, ten one-act plays, and have had seven out-of-town engagements. Twenty-nine students have taken part in these plays. "Wind of the South," a very difficult play is in rehearsal at present, and will probably be presented at the Federated Woman's club early in June. This will close their season.

Mr. Fager has planned a very ambitious program for next year which will be announced in the fall.

"Not a man in a million under 40 is worth listening to, except for gag lines and clowning."

Walter B. Pitkin, Professor of Journalism at Columbia University.
