

Journey

By Caroline Reilly

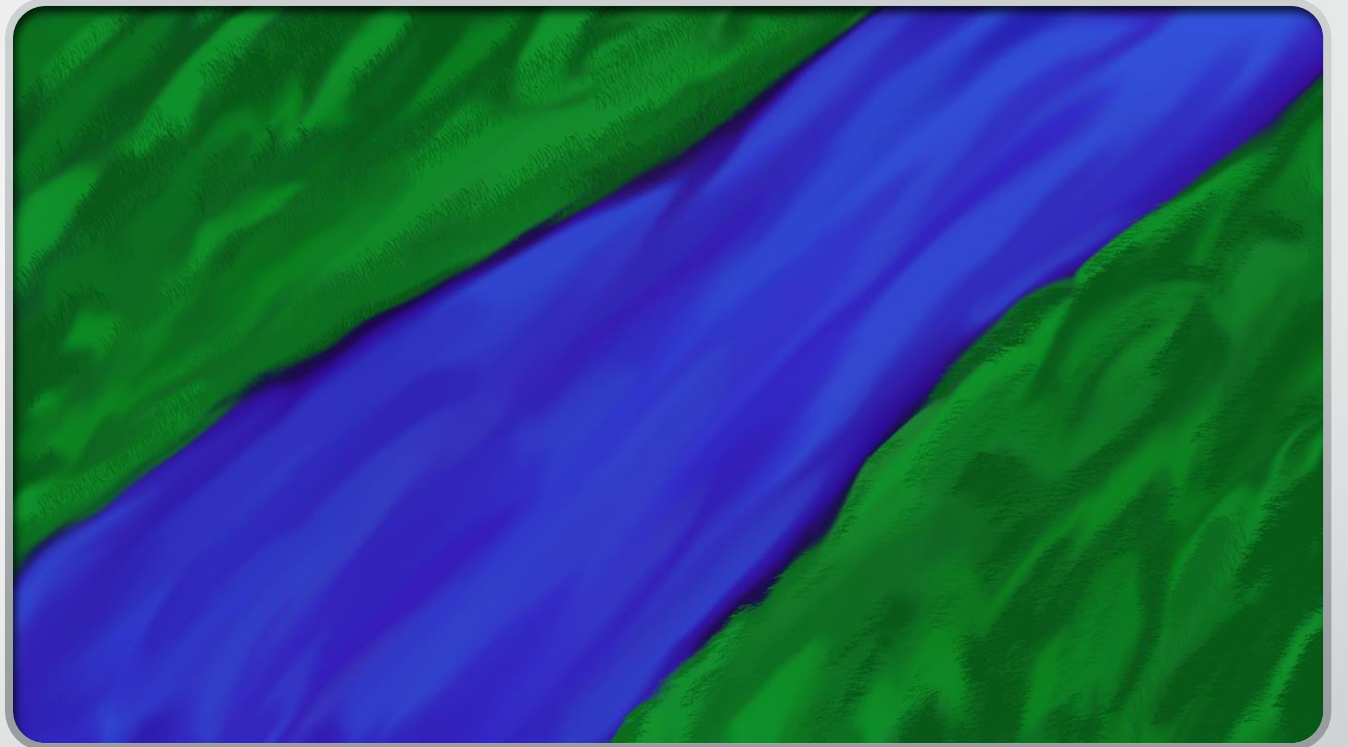

The Beginning of the Journey

- Videos were taken of my dog running to get an understanding of how a dog moves
- Then came the fun part of getting the videos into Animate (Thank you Dana!)

Venturing across the Sea

- After drawing many frames (4,200 frames but who's counting), now came the fun part of creating the backgrounds in Photoshop
- Many inspirations came from driving around Florida so much when visiting my older sister down in Ft. Lauderdale

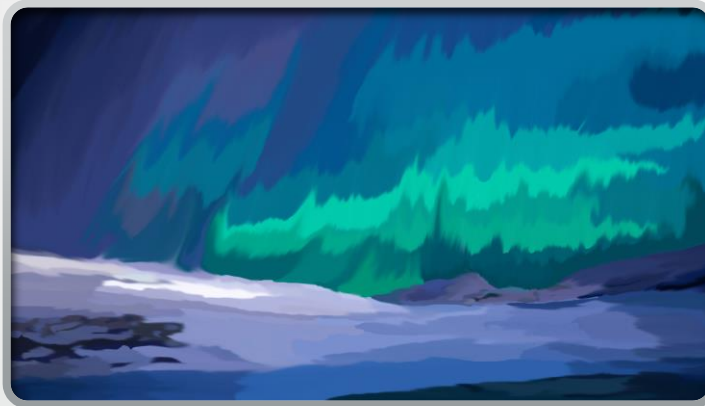

Landfall

- After traveling months across the ocean that is Animate it was finally time to combine the backgrounds with the animation (Thank you Ivette!)

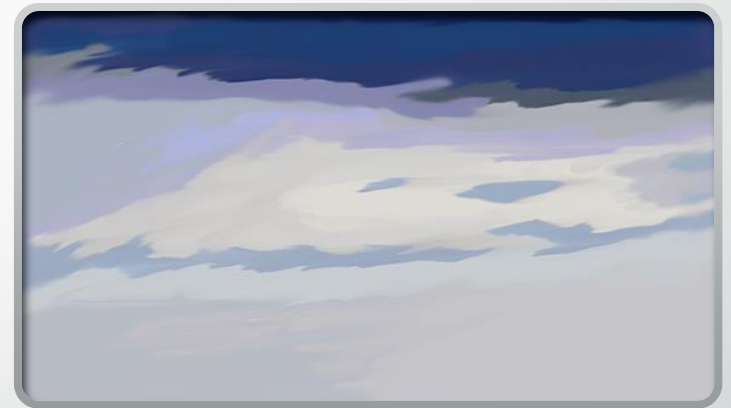

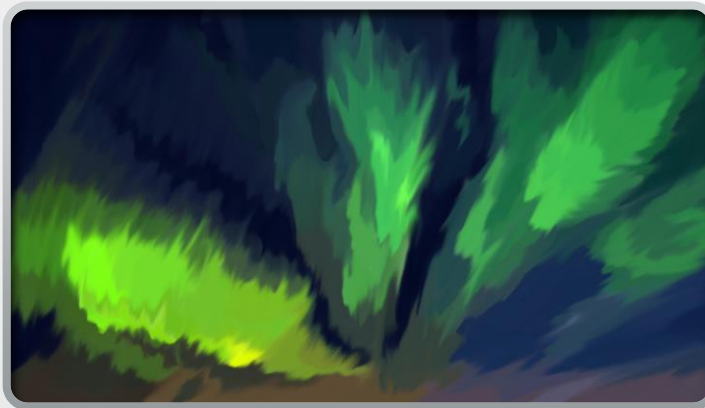

Quest Accepted

- Continued working on creating more backgrounds
- Creating the aurora borealis was a challenge

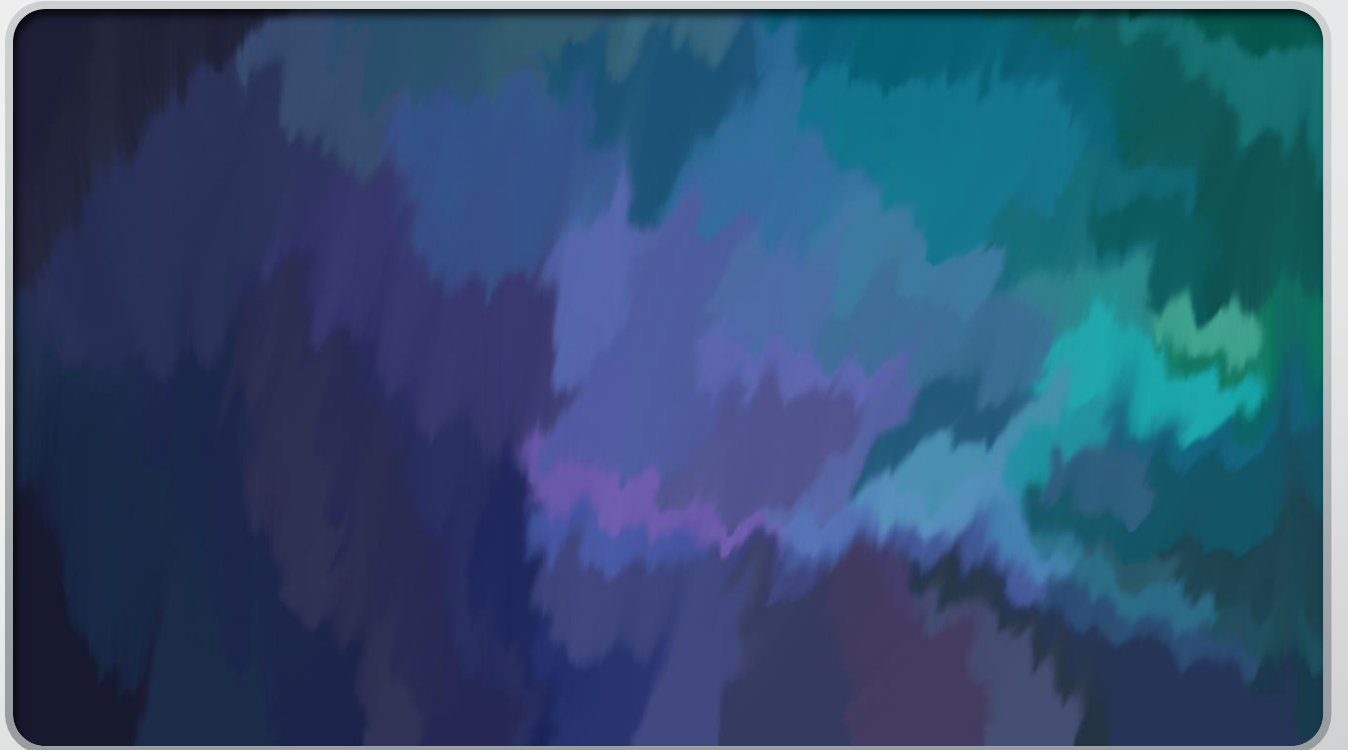

Traveling across the lands

- Had to create more backgrounds because I felt there wasn't enough

Arrival at the castle

- After putting in the backgrounds it was time to export them and edit them in Premiere

Defeating the demon lord

- Finally was able to put in sounds and edit the videos
